Blockchain:	Solidity, Rust, Cairo
DevOps:	GitHub Actions, Docker Compose
Tools & Collaboration:	Git, Github, Postman, Figma, Slack

PROJECTS

Emotion Detection Extension *HTML, CSS, JavaScript*

<https://github.com/Ekam-Bitt/emotion-detector-extension>

A Chrome extension that helps content creators quickly understand audience feedback on their posts and videos. It analyzes comments from YouTube, X (Twitter), and Reddit, using the Cardiff NLP twitter-xlm-roberta-base-sentiment model from Hugging Face to classify text into positive, negative, or neutral sentiment.

Realtor Website *React.js, Tailwind CSS, Firebase, Leaflet*

<https://realtor-clone-react-ekam.vercel.app>

A fully functional replica of the realtor.com website was meticulously crafted from the ground up, using React.js and Tailwind CSS. The authentication system was seamlessly integrated through Firebase. Has proper sign up/login, database management & can post properties for sale or contact landlord for purchase.

ELD Trip Planner *Django, React.js, Tailwind CSS, Mapbox API, PostgreSQL, Docker, Github Actions*

<https://ekam-bitt.github.io/eld-trip-planner-public/>

A full-stack Electronic Logging Device (ELD) and Trip Planning web app for truck drivers. It automates trip route generation, hours-of-service (HOS) logging, and logbook visualization with FMCSA compliance. Features include driver authentication, personalized profiles, Mapbox-based route mapping, and automatic duty status graph generation.

Dermacure.AI *Next.js, Typescript, Tailwind CSS*

<https://dermacure-ai.vercel.app>

Our platform uses AI and Chat-GPT 3.5 turbo API to identify skin problems through conversation and images. With a 99.5% accurate AI model, users can get instant dermatological advice. Additionally, our telemedicine feature allows users to share AI-generated reports with specialized doctors for approval and personalized recommendations.
